# Trips Tracked

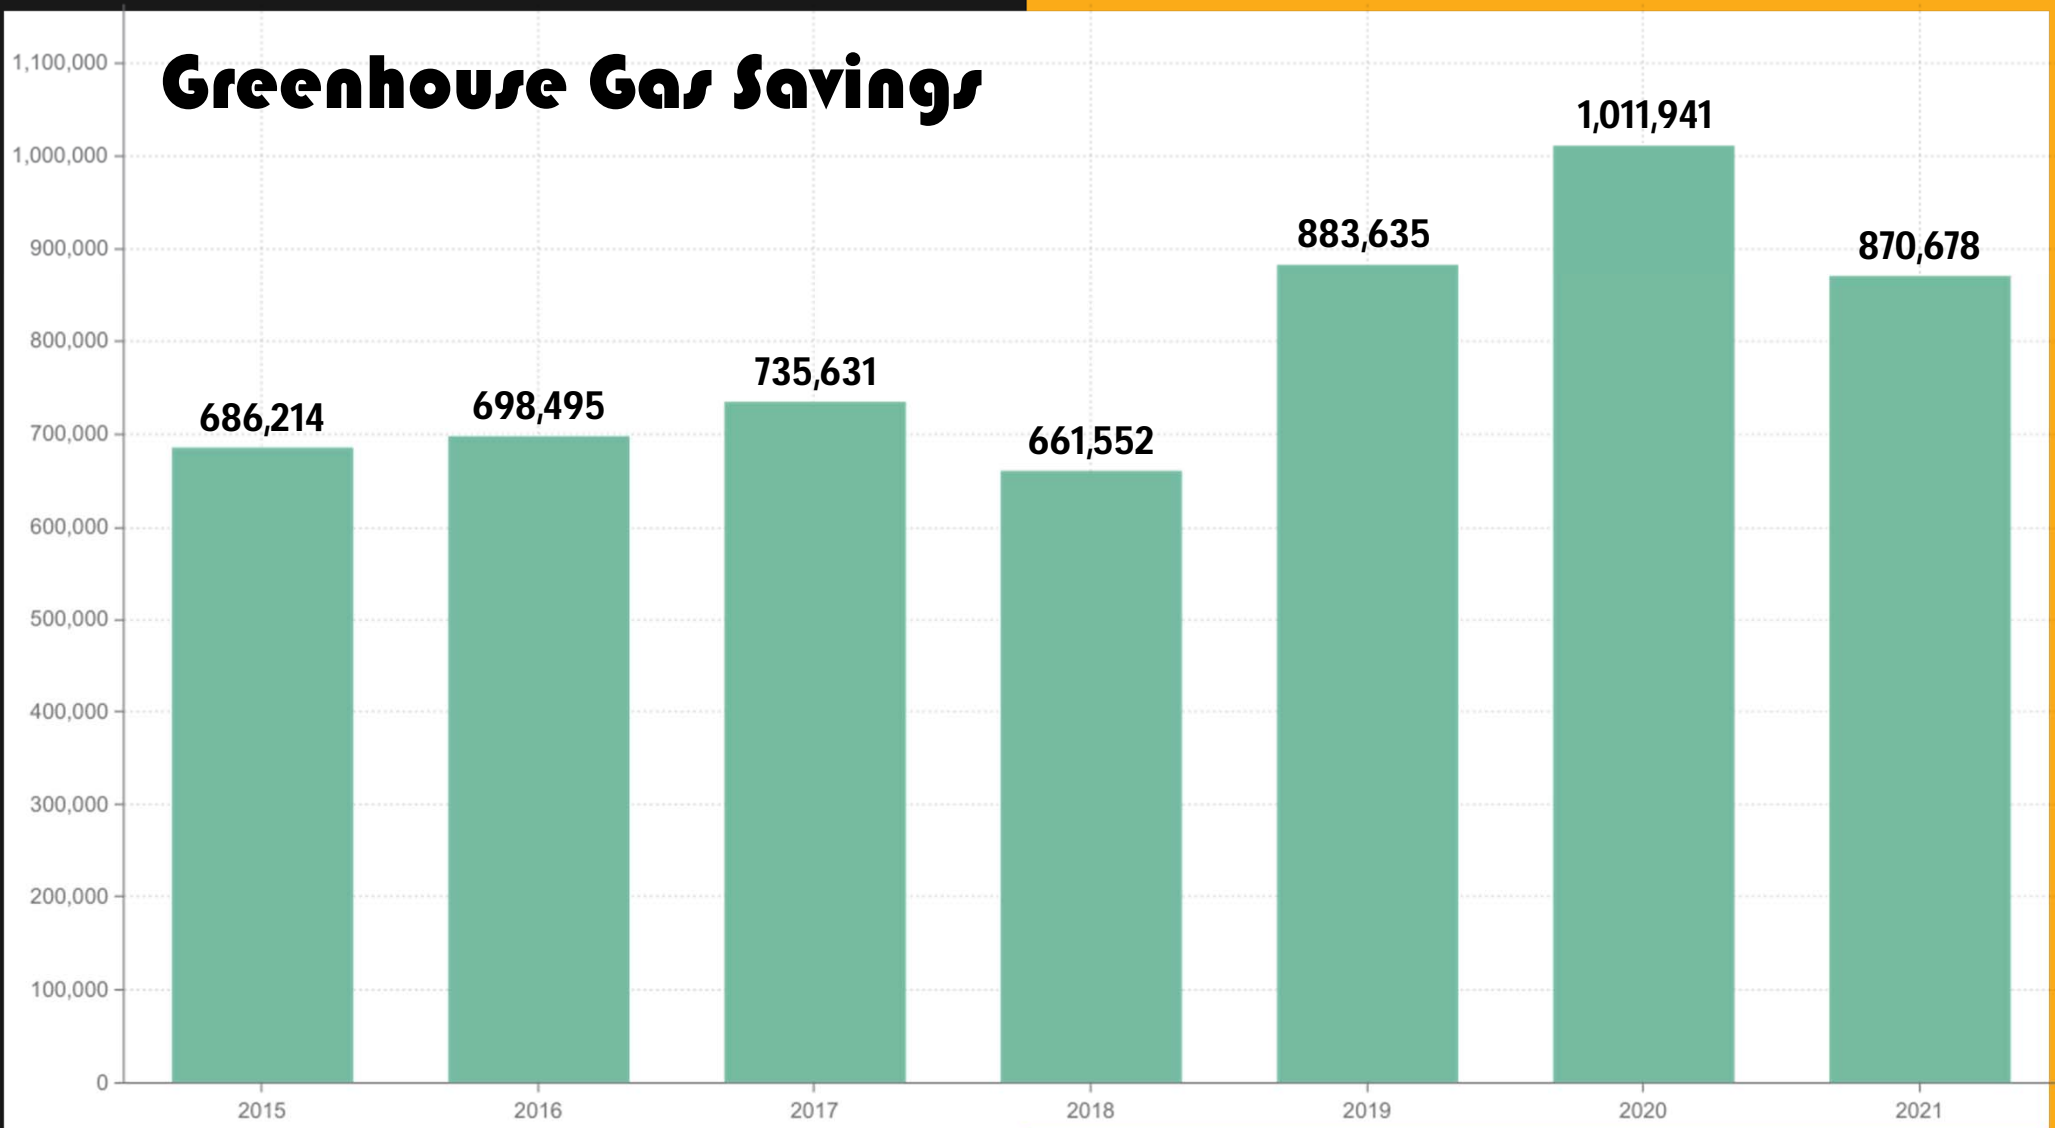

# Vehicle Miles Traveled

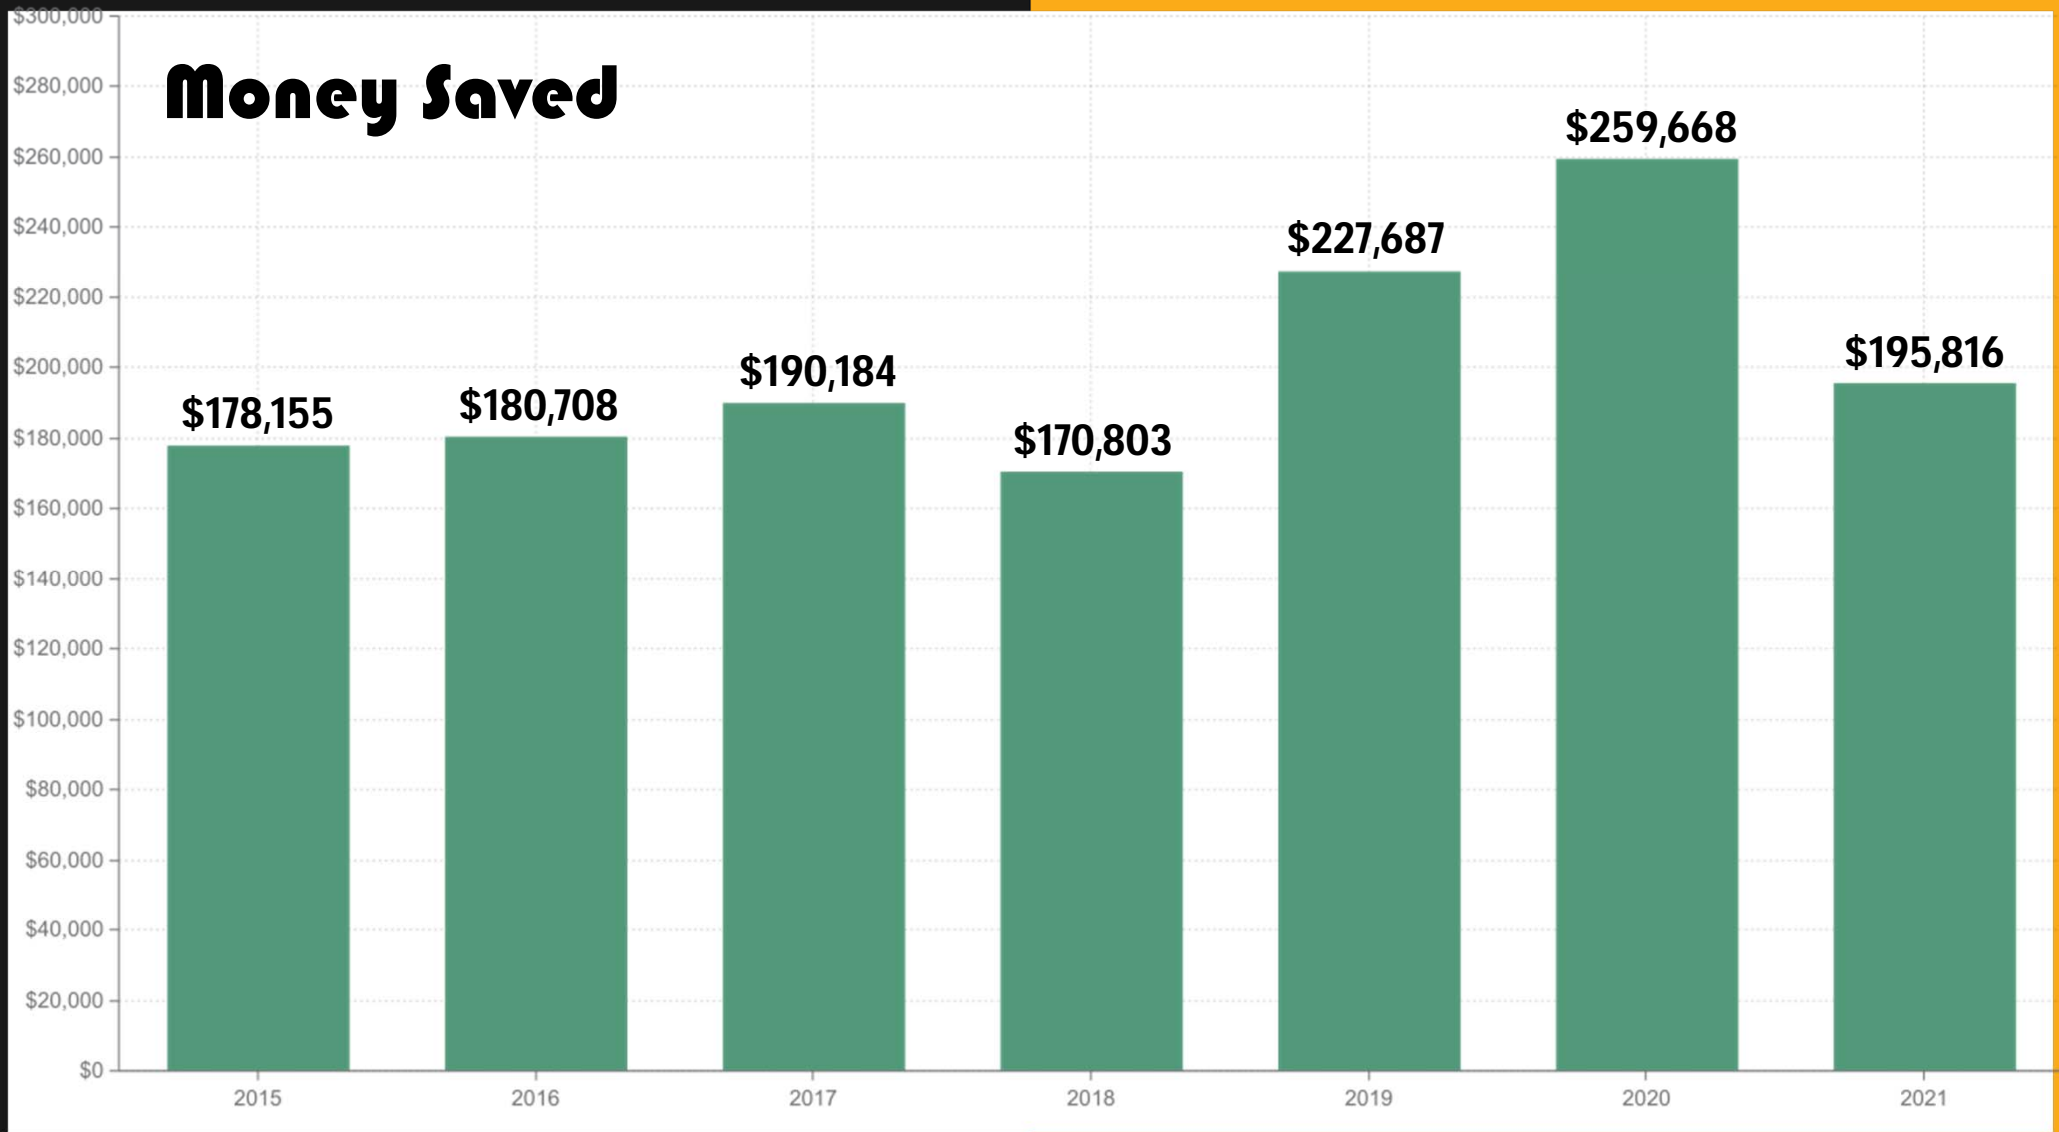

# Greenhouse Gas Savings

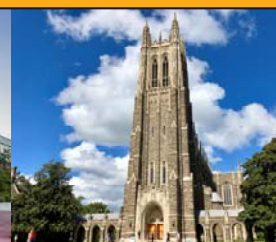

# Money Saved

	<b>4.2 million</b> vehicle trips avoided	Based on average commute times, that's nearly <b>73,000 days (or 200 years)</b> not spent driving a car	
	<b>2.2 million</b> gallons of gas saved	It would take <b>265 tanker trucks</b> to hold that much gas	
	<b>54 million</b> commute miles reduced	That's equivalent to driving from San Francisco to New York City <b>more than 19,000 times</b>	
	<b>40,600</b> alternative transportation users supported	If they all drove alone, their cars would span <b>115 miles</b> bumper-to-bumper	
	<b>44 million</b> pounds of Carbon dioxide (CO2) release prevented	That's the same as <b>3,600 homes</b> not using electricity for a year
