E-470 Public Highway Authority

Mike Hart
Director of Information Technology

Jennifer Larsen
Business Analyst, Manager

I-25 Express Lanes
Colorado Department of Transportation

Stacey Stegman
Director of Public Relations

Q&A

Desired Outcome: The RTA group will receive additional information about how the Regional Transportation District (the regional transit agency) develops and executes bus and rail transit operations for the region. We will also gain an understanding of the operational and outreach policies of toll road and a high occupancy-toll lane in metro Denver, including how they work together to improve travel options.

Denver Transit and Toll Roads Tour

Patrick McLaughlin
Transit Oriented Development Associate

Ryan Mulligan
FasTracks Consultant

Desired Outcome: There is no better teacher than direct experience, and that is exactly what the RTA group will receive with will take a tour of Denver bus and rail facilities, including the downtown transit mall and the light rail system. In addition, after hearing a presentation about toll roads and toll lanes, it only seems appropriate that we conclude our visit to Denver by traveling on both of these open road toll facilities as we return to Denver International Airport.
